## About me

Senior Telecommunication Engineer combining strong technical acumen in mobile networks with project management skills. Expert in bridging the gap between technical requirements and field performance for 5G/LTE deployments. Extensive background in managing testing lifecycles, from lab to live network, and leveraging deep chipset debugging (Qualcomm/Mediatek) to coordinate with OEMs and accelerate defect resolution. Dedicated to ensuring robust device connectivity and high-quality product delivery.

## Skills

## Experience

- Sep 2024 Present Modem/NAD Function Owner - Jember Eng. Sol. Malaga
  - Premium Automotive OEM technical interface towards Tier-1 module supplier to drive defect resolution on Qualcomm/Mediatek platforms.
